

Senna Powder Specification

Introduction : Senna has been used as a very effective purgative since ages. It is the largest and oldest exported item from India. It is used in the form of Herbal Tea. We make Senna Powder from healthy fresh leaves which are collected and washed to remove impurities. These Senna leaves should be free from any contamination by environmental toxins. Then it is grinded to make the fine powder.

Analytical Specifications	
Origin	India
Plant	Casia Angustifolia
Plant parts used	Leaves
Description	Fine Brown Colour Powder
Identification	Passes by TLC
pH OF 10% w/v Solution	7.12
Loss of Drying	Below 5%
Heavy Metals	NMT 60 ppm
Residue on Ignition	Below 8%
Assay of Sennosides	Above 60%
Microbiological Test	
Total Plant Count	Below 1000 cfu/Gm
E.Coli	Absent/5g
Yeast and Mould	Below 100 cfu/Gm
Salmonella	Absent/5g
General Information	
Packing	25 Kg HDPE Drums
